

# DIVE COMPUTER GROUP BUY - AQUALUNG I300

## FEATURES

- 4 modes: Air, Nitrox, Gauge (run time) and Free Dive, and also allows you to switch between DIVE and Free on the same day
- User changeable battery and data retention
- Optional deep stop algorithm
- Automatic altitude selection
- Automatic salt/fresh water detection
- Audible alarms and high-vis LED
- Blue/black or grey/black strap (color not selectable for the group buy)
- Interface with a computer (requires optional cable, not included in the kit)

## Product details:

<http://www.aqualung.com/us/dive-gear/i300>

**VINNIE SAYS:** This oversized dive computer fixes 2 of the major issues of the Suunto Zoop, the dive pro favorite in this price range: it has user-changeable batteries and it has a more liberal algorithm which allows you more bottom time (and is still safe enough). And it has a full set of features - user selectable dive time remaining & nitrogen loading alarms, backlighting, instant switching between Free and Dive modes, a very legible display, automatic altitude and fresh water adjustments, etc. etc.

It uses a Pelagic Z+ algorithm (a derivative of Buhlmann) that is used by several brands of dive computers. This is a moderately-conservative algorithm, slotting in between the ultra-conservative RGBM (good for dive centres) and the ultra-liberal Pelagic DSAT (good for experienced divers who are more able to assess their risk factors). My review of the computer here: <http://diveindia.com/2016/06/29/5050/>

## Group Buy Notes:

The strap will come with either a blue or grey trim. This cannot be selected for the group buy.

**Group buy price: Rs 19,500 incl shipping and VAT**

**Regular selling price: Rs 21,000 all incl (MRP: Rs 23,700 + shipping)**
